EDUCATION

University of Colorado Boulder

August 2024 - May 2026

Master of Science in Computer Science

Boulder, Colorado

GPA: 3.70/4.00 | **Coursework:** Datacenter-Scale Computing, Machine Learning, Database Systems

K.J. Somaiya College of Engineering

August 2020 - June 2024

Bachelor of Technology in Computer Engineering

Mumbai, India

CGPI: 8.71/10.00 | **Coursework:** Advanced Algorithms, Natural Language Processing, Software Architecture

INTERNSHIPS

Credible

September 2025 – April 2026

Software Engineer - Capstone

Boulder, Colorado

- Built **Credible Atlas**, an AI-powered conversational analytics platform that enables natural-language exploration across **PostgreSQL**, **BigQuery**, and **Neo4j** and generates **12 interactive visualization types**.
- Led **Node.js** backend and **GenAI** workflow development, integrating the **Claude Agent SDK**, **Auth0**, and **3 Model Context Protocol (MCP)** tools for context retrieval, query execution, and chart customization.
- Deployed the **full-stack application** to production on **GCP** using **Docker**, **Cloud Run**, and **CI/CD** with health checks and automatic rollback; earned **2nd Place** at the CU Boulder Capstone Expo.

University Of Colorado Boulder

April 2025 – Present

Data Analyst Intern

Boulder, Colorado

- Developed a **Python**, **Pandas**, **Streamlit**, and **Plotly** forecasting application that normalized **7,611 transaction records** across **176 events** and **13 revenue classes** for interactive revenue-risk scenario analysis.
- Implemented preprocessing and key-based record linkage across **3 operational data systems**, matching **74 of 82 events (90.2%)** while flagging unmatched records and preventing double-counted metrics.
- Engineered deterministic daily capacity-simulation and baseline-forecasting models with configurable loss and growth assumptions; wrote **22 pytest tests** for validation, date boundaries, and projection logic.

Schneider Electric

June 2023 – July 2023

Software Development Intern

Mumbai, India

- Integrated **Building Management System (BMS)** data with real-time **SCADA** pipelines, enabling structured extraction and processing of operational data for analytics and reporting.
- Built a **C#/ASP.NET** reporting tool that ingested SCADA data into **SQL Server**, applied validation and transformations, and generated dynamic reports for HVAC performance monitoring.
- Designed data-handling workflows that converted raw BMS and SCADA signals into actionable HVAC performance insights for **Riyadh Metro** and **Etihad Rail**.

Polyvault Shelters

July 2021 – August 2021

Software Development Intern

Mumbai, India

- Hosted an eCommerce website for Polyvault Shelters with product-catalog and payment-processing workflows.

PROJECTS

NeuroFit.AI | LLM-Powered Fitness Assistant – Python, Streamlit, Langflow, Astra DB

- Built an **LLM-powered** fitness assistant in **Python** and **Streamlit**, orchestrating **2 Langflow workflows** for personalized wellness Q&A and macronutrient planning.
- Implemented **retrieval-augmented context** with **Astra DB**, retrieving profile-scoped notes to ground personalized **LLM** fitness and nutrition recommendations.
- Parsed **4-field JSON** macronutrient outputs into Streamlit metric cards and implemented fallback handling for malformed **LLM** and API responses.

Online Course Recommendation System - Team Project | React, Node.js, Express, Neo4j Aura, GCP

- Built a full-stack course recommendation platform with **React**, **Node.js/Express**, and **Neo4j Aura**, modeling Student, Course, and Topic entities behind a **16-endpoint REST API**.
- Implemented **JWT authentication** with bcrypt password hashing and route-protection middleware; automated **GCP** infrastructure provisioning for **3 VMs** across frontend and backend services.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript/TypeScript, Java, C#, SQL

Frameworks: React, Node.js, Express, FastAPI, Spring Boot, ASP.NET, Streamlit

AI & Data: Claude Agent SDK, MCP, RAG, LangChain, LangGraph, LangFlow, LLMs, PostgreSQL, BigQuery, Neo4j, Snowflake, MySQL, MongoDB, Astra DB, SQL Server

Cloud & Tools: GCP, AWS, Docker, Kubernetes, CI/CD, Git/GitHub, Postman, PySpark, Hadoop
