EDUCATION

University Of Colorado Boulder

Master's in Computer Science

August 2024 - May 2026

Boulder, Colorado

K.J. Somaiya College of Engineering

Bachelor of Technology in Computer Science

August 2020 - June 2024

Mumbai, India

INTERNSHIPS

Credible

Software Developer - Capstone

September 2025 – April 2026

Boulder, Colorado

- Built **Credible Atlas**, an AI powered conversational analytics platform for exploring datasets, interacting with community published visualizations and blog posts, and generating insights using natural language.
- Led the design and development of the **Node.js backend** and **GenAI workflow** by building and integrating **MCP servers** with the **Claude Agent SDK** and **Auth0**, enabling secure tool driven query execution, semantic context retrieval, and automated visualization generation.
- Architected and deployed a scalable full stack system using **React**, **PostgreSQL**, **BigQuery**, and **GCP** with automated **CI/CD** pipelines, enabling low latency analytics workflows; project received **2nd Place** at the university capstone expo.

University Of Colorado Boulder

Data Analyst Intern

April 2025 – April 2026

Boulder, Colorado

- Developed a financial forecasting and analytics system using **Python**, **Pandas**, and **Streamlit** to analyze conference revenue and support operational planning for CU Boulder teams.
- Designed reporting workflows and managed conference registration and abstract submission platforms using **Stova**, improving data handling, event management, and insight generation for non technical staff.

Schneider Electric

Software Development Intern

June 2023 – July 2023

Mumbai, India

- Worked in the HVAC domain integrating BMS systems with SCADA data pipelines, enabling structured extraction and processing of real-time building operational data for analytics and reporting.
- Built an ASP.NET based reporting tool that ingested large-scale SCADA data into SQL Server, applied validation and transformations, and generated dynamic reports for monitoring HVAC performance.
- Designed and implemented data handling workflows to convert raw BMS and SCADA signals into actionable insights, improving visibility into system performance for large infrastructure projects like Riyadh Metro and Etihad Rail.

Polyvault Shelters

Software Development Intern

July 2021 – August 2021

Mumbai, India

- Developed and hosted a full-featured eCommerce website <https://www.polyvaultauto.com/> with product listings and payment processing, optimizing customer transactions.
- Delivered end-to-end functionality for the online store, including effective product listing systems and efficient payment processing solutions that enhanced monthly revenue generation efforts.

PROJECTS

NeuroFit.AI - Multi-Agent NLP System for Personalized Health | *Langflow, LLMs, Streamlit, Astra DB*

- Built a multi-agent system powered by **Langflow** and **LLM**, routing user wellness queries to specialized agents.
- Integrated Retrieval-Augmented Generation (**RAG**) with AstraDB for contextual memory retrieval.
- Delivered a **Streamlit UI** with session persistence and asynchronous query execution (2 s response time).

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript

Frameworks & Web: React, Node.js, Express, Spring Boot, FastAPI, Streamlit, HTML, CSS

AI & Analytics: MCP, Malloy, LangChain, Retrieval-Augmented Generation (RAG), LLMs, LangFlow, LangGraph

Databases: BigQuery, PostgreSQL, Snowflake, MySQL, MongoDB, Neo4j, Astra DB, SQL Server

Big Data: PySpark, Hadoop

Cloud & DevOps: GCP, AWS, Docker, Kubernetes, CI/CD pipelines

Tools: GitHub, Visual Studio Code, Figma, MS Excel, WordPress, Postman
